

ESO

Electronic Shut Off

Physical Dimentions	1.75"X1.75"X1.75"
Cable length	6'
Operating Voltage	+11v - +33v DC
Current Draw	.068 mA

Requires a 10k Pull Up or an Open Collector

Mounting Instructions

1. Clean mounting area and make sure surface is smooth.
2. Use a cable tie to secure the ESO to the wellhead.
3. The two (2) magnetic contacts should be in line with the tubing or lubricator to insure the ESO can not be moved.
4. Make sure the ESO can not be moved. If it moves it could cause a premature shut in.
5. Silicone can be used to help secure the ESO to the wellhead.
6. ESO does not require a stainless steel nipple.
